solutions

ABOUT US

With more than 19 experience, Civitas provides customized integrated solutions, designed at the highest level of quality and efficiency, gathering services delivered by Civitas Systems - security systems integrator, life & safety , it & c and traffic management, Civitas PSG-goods and people guard and private service for emergency situations and Civitas Dir-monitoring and rapid intervention.

Integrating the right technology, people and in-depth market knowledge with our national network resources, we deliver solutions for long term cost reduction, operative efficiency and a maximize of the return of investment. our ability to deliver consistent, reliable solutions is based on a time proven methodology that places customer needs above all considerations.

We employ more than 1,700 skilled people, that are involved in our mission and they follow the guiding principle that our partners needs and finding the optimum solution are the primary goal. The engineering team with wide field expertise enables high standards performance complying technological, safety and security standards. For more than 7 years we are Panasonic Premier Integrator and Bosch Certified Dealer in Romania. We are certified for classified information and our informatics system is ORNISS (the national registry office for classified information) certified with tempest protection.

In the manned security area we have a strong national infrastructure, delivering high quality services through strategic partnerships. The partners selection is the result of a strict evaluation audit, which is a permanent process, with key indicators: proficiency, performance, ethics and law respect.

Strong financials mean the ability to offer customized integrated solution for any activity area from infrastructure, energy, industry, retail to civil buildings. operational infrastructure and financial power enables us delivering very high standards integrated solutions.

Our expertise delivering complex security solutions was enriched with the opportunity to expand into new markets like Bulgaria and Serbia.

SERVICES

Consulting

Security systems, life & safety and IT&C

Service and maintenance of security systems

Manned security

Monitoring and rapid intervention

Private service for emergency situations

CONSULTING

Security consulting

Risk management

- Risk analysis

- Choosing the adapted security strategy

Security management

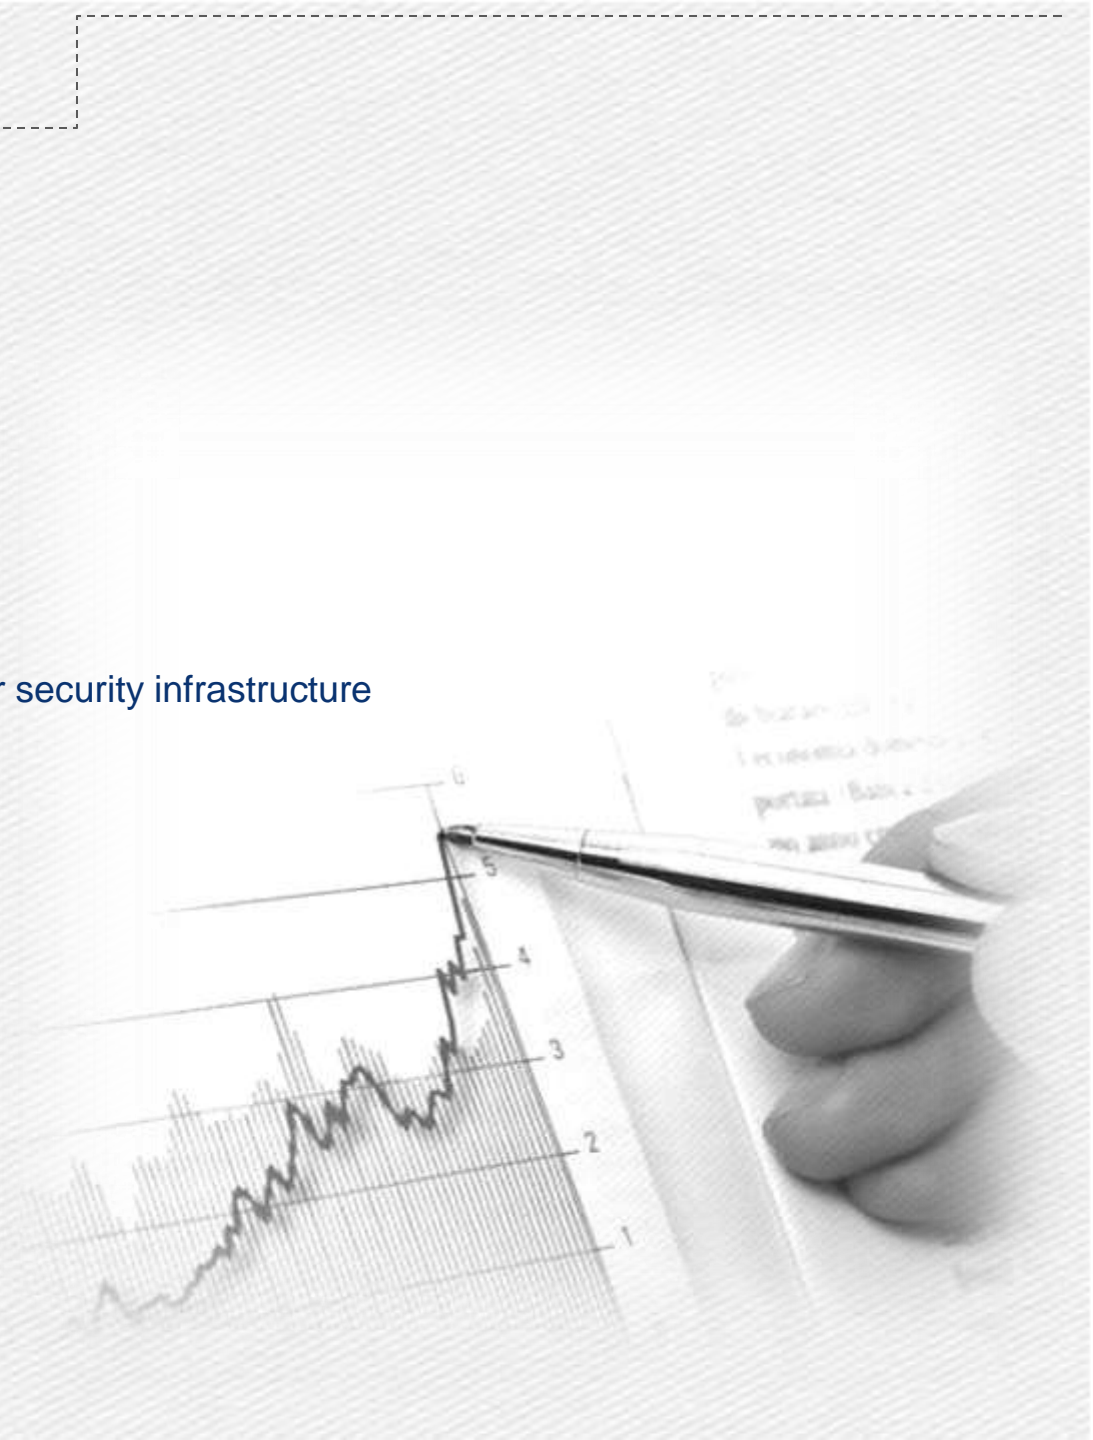

- Project plans and technical documentation for security infrastructure

- Implementing security system

- Testing and evaluating the security systems

- Personnel training

 - Optical fiber detection

 - Sensitive cable detection

- Video surveillance systems

- Access control

 - Biometric identification solutions, magnetic card,

 - proximity card, chip card, smart card

 - turnstiles, barriers, road blockers

- Software for security systems integration

Mechano- physical systems

Life&safety systems

- Fire detection and extinguishing

- Public address and voice evacuation systems

Electromagnetic and TEMPEST protection

- Service and maintenance for electronic security systems

Communication systems

- Structured cabling

- Radio communication

- Conference, simultaneous translation and sound systems

IT security systems

- Data communications security

- IT security audit and internal rules

- Intrusion detection and internal protection through antivirus

- Solutions using local update servers

- Data backup and disaster recovery planning.

Traffic Management

- Interurban traffic management

- Urban traffic light control system

- Parking solutions

- License plate recognition for crossing border control

SERVICE AND MAINTENANCE FOR SECURITY SYSTEMS

Call center 24/7/360

Incidents management with help-desk dedicated software

Qualified personnel for technical support country wide

MANNED SECURITY

Security and protection of properties and persons

Wireless patrol control

Guard tour system (with both real time and off-line data monitoring)

Time & attendance for moving operators (remote yards)

Maintenance services control (lifts, fire extinguishers, boilers,...)

GPS tracking

Lone worker's alarm (man down)

Special transportation guard

Collection, transfer and storage of items, cash, products with special character

Accompany the transport of dangerous substances with special trained and equipped personnel

Securing events and public demonstrations

Bodyguard

Office security guard

Control access

Interfacing with customers, suppliers, personal staff or visitors of the office building, helping them with information and accommodation

Ensure that all concierge emails and telephone calls are dealt with in a timely and professional manner.

Other administrative and clerical duties

FLYING SQUADS AND DISPATCH

The agents are special trained ,selected according to strict criteria: the polygon drawing sessions, physical training in gym, regular psychological tests.

The intervention teams are equipped with appropriate equipment, approved by PGI:

Lethal weapons

Protective equipment

Mace

Pepper spay

Electroshock

Mobile Phones

Portable stations broadcasting reception

Performance cars strategically located

MONITORING CENTRE

The alarm system can be connected to the monitoring centre through: phone, GSM, GPRS, LAN

Energetic autonomy through own generator

Efficient communication trough mobile stations and phones with flying squads

We collaborate with all phone carriers with own communication channels

PRIVATE SERVICE FOR EMERGENCY SITUATIONS

Identification and assessment of fire risk

Drawing up action plans in case of emergency (response plan in case of fire, evacuation plan for people and assets, plan of action in case of specific emergency)

Prevention activities (fire warden)

Assistance for fire risk works

Emergency response for fire fighting and fire starters

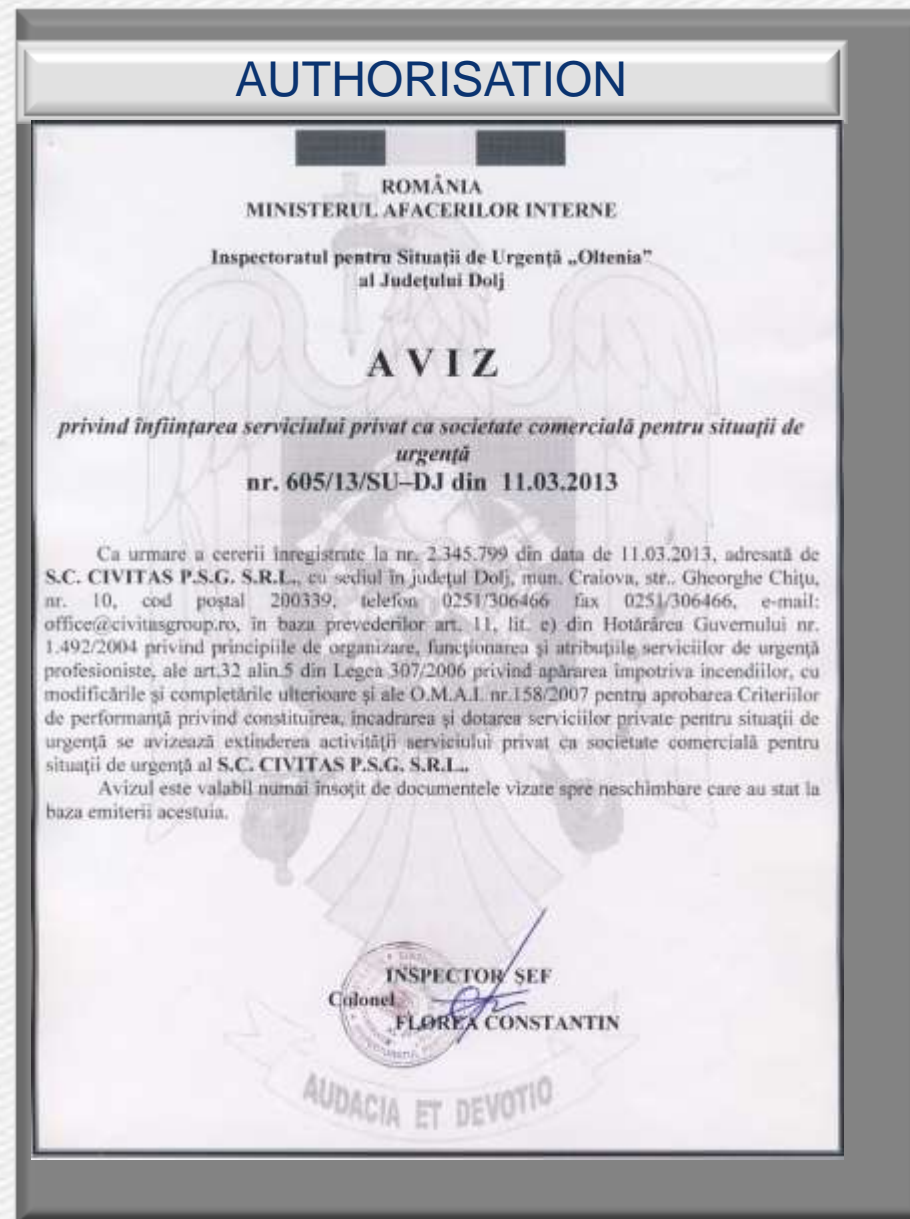

Rapid intervention to rescue, extrication and first aid

Storm water discharges, water transport

Release access roads of debris and windfall

Drafting legal specific documents for defense against fire and civil protection

Training employees for the emergency situation

PARTNERS

Strategic partnerships with top manufacturers

Certified
Security Dealer

more than 5 years CERTIFIED DEALER BOSCH

more than 7 years PANASONIC PREMIER
INTEGRATOR

since 2010 partnership with UTC-GE

2012 Optasense PARTNER for ROMANIA

WE INTEGRATE ELECTRONIC SECURITY SYSTEMS WITH MANNED SECURITY FOR COMPLETE SECURITY SOLUTIONS

Professionalism defines the way we do business and includes all the elements that are essential to us: people, quality, innovation, technology.

Monitoring system, control and fraud detection

IP video monitoring system monitors and records 24/24 images from cameras, performs intelligent video analysis and writes in a database all system events. Charging subsystem is correlated real-time with video control, thus creating permanent possibility of remote control. The system benefit of multiple facilities, so by applying these solutions results in obtain long-term investment cost optimization and the anti-fraud system lead revenues increase.
